

Santa's Reindeer

Santa's reindeer are a noisy bunch. But each of the sixteen of them makes a different combination of noises so Santa can tell them apart in the dark.

There are sixteen reindeer corresponding to the numbers 1 to 16. Below you can see the name of each reindeer and the noises it makes. For example, Rudolph goes "whinney, humph, snort, jangle, snuffle".

Each noise corresponds to a different mathematical property. These are:

prime number	multiple of 10
square number	factor of 24
multiple of 3	less than 10
multiple of 5	less than 12

As well as these, each reindeer jingles or jangles, but not both.

Which reindeer goes with which number?

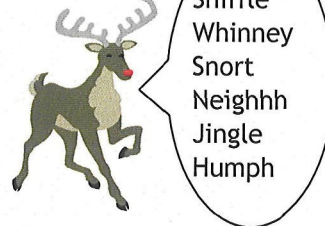

Chocolate

Starburst

Prancer

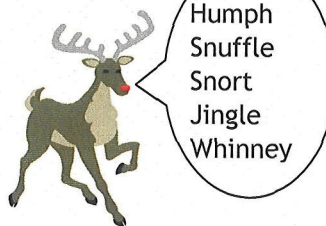

Rocket

Tiny

Dasher

Wild Thing

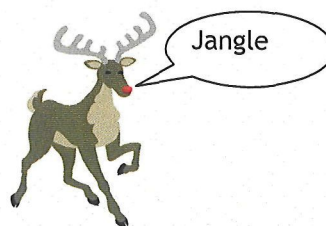

Sparkler

Silver

Nightfire

Snowflake

Speedy

Martin

Jet

Rudolph

Happy
